

LOWER CENTER STREET PARKING LOT

Starting on Wednesday, April 19th, construction on the Lower Center Street Parking Lot will begin. As a result, the parking lot will be completely closed off for approximately 2 weeks to allow the contractor to efficiently complete the reconstruction work. Signage will be posted throughout the duration of the project advising motorists of the parking lot closure.

WATER STREET PARKING LOT

Starting on Wednesday, April 19th, curb replacement will start at the Water Street lot. This will require several parking spaces to be blocked off in order to complete the work, but the parking lot will remain open. On/about Wednesday, May 3rd, final construction on the Water Street Parking Lot will begin. As a result, the parking lot will be completely closed off for approximately 1 week to allow the contractor to efficiently complete the reconstruction work. Signage will be posted throughout the duration of the project advising motorists of the parking lot closure.

MUNICIPAL BUILDING PARKING LOT

On/About May 22nd, construction on the Municipal Building Parking Lot will begin. As we get closer to this date, more specific information on the closure will be provided. However, due to the fact that this parking lot is needed for both municipal and public uses, construction will take place in several phases, which will allow the lot to be partially open during the construction.

We understand that this may be an inconvenience, but due to the heavy use of all three parking lots, periodic maintenance is required. Should you have any question on the project itself, please contact the Town Administrator, Rich Phelan, at 908-735-8616.

Thank you in advance for your patience.
